

EDUCATION

- **University of Bristol** Bristol, United Kingdom
MEng Computer Science - 1st Class Honours *September 2018 - July 2023*

EXPERIENCE

- **Lloyds Banking Group** *October 2024 - Present*
 - **Finance Data Engineer - Finance Data Lab**
 - **Role:** Defined, developed, and maintained strategic commercial banking data pipelines and products for MI, ML-Ops, and general ledger consumption - handling daily volumes in excess of £50 billion.
 - **Technologies and Languages:** GCP, Apache Airflow, Jenkins, Harness, Python, SQL, DBT
 - **Personal Accomplishments:**
 - * Architected, implemented, and led the rollout of the Finance Data Lab's data pipeline rollback and re-run-ability frameworks.
 - * Engineered the synthetic data generation tool in-use by developers and analysts across the lab.
- **University of Bristol** *May 2023 - October 2024*
 - **Computer Science Teaching Technologist**
 - **Role:** Delivered lectures, wrote material, and provisioned technical platforms for computing-related content across all years of various programmes across the faculty of science and engineering - in addition to in-house consultancy for student projects.
 - **Technologies and Languages:** AWS, Azure, Unity, Arduino, Raspberry Pi, Electronics, Digital Radio, C, C++, C#, Java, Python, GO.
 - **Personal Accomplishments:**
 - * Architected, delivered, and maintained a multi-account AWS Environment - introducing official public cloud capability for undergraduate and post-graduate-taught projects and research.
 - * Wrote and delivered the final year Mechanical Engineering coursework for Multivariable and Nonlinear Control
 - * Designed and built the framework for the MSc Financial Technology coursework in the form of a multi-player/multi-agent securities exchange platform.
 - * Became a qualified lecturer, gaining FHEA certification.
- **T-B: Phase** *May 2022 - November 2022*
 - **AI and Robotics Engineer**
 - **Role:** R&D Engineer in a small team part of the Thales-Bristol Partnership in Hybrid Autonomous Systems Engineering - focusing on swarm robot command-and-control.
 - **Technologies and Languages:** ROS, MicroROS, Assembly, C, C++, Python
 - **Personal Accomplishments:**
 - * Developed a framework to live-deploy local model updates to physical swarm agents in response to machine learning simulations.
- **University of Bristol** *Sep 2020 - May 2023*
 - **Lead Teaching Assistant**
- **The Harbour School** *March 2020 - March 2022*
 - **Website Administrator**
- **The Harbour School** *May 2019 - September 2019*
 - **IT Technician**

HONORS, AWARDS, AND QUALIFICATIONS

- GCP ACE - 2025
- Fellow of the Higher Education Academy (FHEA) - 2024
- Hewlett Packard Enterprises Award - Top Bristol Computer Science Master's Degree Project - 2023
- Top 3rd Year Computer Science Group Project - 2021
- Top 2nd Year Computer Science Group Project - 2020
- Aardman UoB CSS Gamejam Winner - 2022

NOTABLE PROJECTS

- **Space Quest 2099:** Self-published multiplayer shooter video-game with co-operative campaign. A slow-burn passion project. Tech: C#, Unity, Networking, 3D modelling, Animation, Sound Design (2018-Present)
- **Goldney Gardens Tour App:** Android app with internal update client, AWS backend. Created to deliver self-guided tours with multimedia content to visitors around historic gardens. Tech: Android, Java, AWS, DynamoDB (2019-2020)
- **SDL2 Raytracing Engine:** Raytracing engine capable of reflective and refractive materials, soft shadows, normal mapping and more. Tech: C++, SDL2 (2020)
- **Robot Wars:** I am a hobbyist roboteer. I design and build fighting robots. Tech: Rapid Fabrication, Electronics, Radio (Present)
